US Trade Deficit

The US trade deficit "narrowed" in August to 31 billion or about 1/2 the size of one year earlier. But, North America still has the widest gap.

North America -5 %

Europe -1.3 %

South America +.1%

Aisa/Pacific + 1.3 %

Former Sov. U+1.4%

Middle East +2.9 %

Value Add

If a customer need arises for smaller runs or prototypes, Sko-Die has a laser machine that can handle cutting a variety of materials. From thin gage lamination material to .400 Hot Rolled or Cold Rolled. Please let us know if we can be of service to you.

Value Add II

One other area where Sko-Die has been able to help our customers needs is with the ability to provide welded cores

using our robotic welder. Typically, laminations are stacked and then bonded together thru welding or riveting. Please let us know if we can be of service to your company in your lamination or part assembly process

New Stamping Lube applicators

To refine our stamping process even further, Sko-Die recently invested in the latest and best stamping lube applicators to provide a more exact amount of lubrication on each and every part that is run thru a punch press.

This not only helps in providing quality parts, but it is a way to make our plant a "greener" environment with eliminating waste and making our air around us cleaner.

Upcoming Special Anniversaries

**Sko-Die as a business Dec 12th (62 years)
Gilberto Vergara 30th (Sko-Die Press Room Operator)**

Thank you for your business, we look forward to providing quality parts on time to our valued customers!
